**DETAILED ACTION**

1. This communication is in response to the applicant's amendment filed on 07/07/2010.

**Status of Claims**

2. Claims 1,25-27, 29-39 have been amended. Claims 2 and 3 have been canceled. Claims 1,5 and 7-39 are pending in the application.
3. Claims 1, 5 and 7-39 are allowed now renumbered claims 1-35.

***Allowable Subject Matter***

4. With regards to claims 1, 25 and 39, the prior art of records, alone or combined, does neither anticipate nor render obvious, inter alia, as a whole, the unique patentable feature of: "simultaneously displaying in real-time at least a first visual favorable/unfavorable trade indicator for the first time intervals and a second visual favorable/unfavorable trade indicator for the second time intervals, wherein the first time intervals are not equal to the second time intervals;" in a computerized method for determining and displaying trading trends.  
  
The reasons for allowance for all the other independent claims and dependent claims are the same as set forth for claims 1, 25 and 39, above because they all include same or similar limitations as indicated above for the reasons of allowance.

**Relevant Prior Art**

5. Li et al ( Patent 7,043,449) , Olsen et al (PGPub 2007/0078755) and Tsagarakis et al (PGPub 2002/0087455) were all cited. An extensive search was performed and no better prior art was found.  
  
For these reasons, claims 1,25 and 39 are deemed allowable over the prior art of record and claims 5,7-24,26-38 are allowed by dependency.

It appears that the instant invention is beyond the skill of one of ordinary art. Accordingly, the invention would not have been obvious because one of ordinary skill could not have been expected to achieve it. Nor would they have been able to predict the results, and as such, they would not have capability of expecting success.
